Decentralized Entities Foundation

Fondation pour les entités décentralisées
(Decentralized Entities Foundation)
Rue de Zurich 6, 1201 Genève, Switzerland

Dear WaterNeuron Community,

We, the Board of the Decentralized Entity Foundation, hereby attest that this security report has been conducted by a qualified researcher with expertise in the Internet Computer ecosystem. We have verified the researcher's identity and confirmed their qualifications. The researcher has chosen to remain anonymous to maintain impartiality and objectivity. The report has been prepared following industry-standard methodologies and best practices to ensure a comprehensive and accurate assessment.

However, it is important to note that the qualified researcher highlights the fact that code audit and security assessment projects are time-boxed and often reliant on information that may be provided by an individual or a team of developers, their affiliates, or their partners. As a result, the findings documented in this report should not be considered a comprehensive list of security issues, flaws, or defects in the target system or codebase.

The Decentralized Entities Foundation (DEF) disclaims all responsibility for any actions taken or not taken based on the content provided. It is intended to provide material for the community to review. The goal of DEF is to help DAOs interact with the civil, legal, and physical world.
